

Berthold Technologies USA, LLC

Technical Services Manager

Job Description and Required Candidate Qualifications

Berthold Technologies USA, LLC, based in Oak Ridge, Tennessee, a wholly owned subsidiary of Berthold Technologies GmbH & CO KG, Wildbad Germany, is seeking to fill the position of Technical Services Manager.

The ideal candidate must be analytical and detail-oriented with excellent troubleshooting and problem-solving abilities. Must have strong communication, leadership and management skills, in addition to excellent customer service skills and the ability to assist and train end-users. The Technical Service Manager also needs strong computer skills and proficiency with word processing and spreadsheet software programs. Multiple language skills may be helpful.

The Technical Service Manager will be responsible for a service group which installs, repairs, replaces, instrumentation for three divisions, includes radiometric gauges, radiation protection and life sciences instrumentation. The ability to work in a multi disciplinary environment as well as being able to prioritize a multiple of tasks is essential

Our candidate should have a BS in Electronics, Physics or Applied Sciences (or equivalent experience). Demonstrated experience in direct and supervisory management is also required.

If you are looking for an opportunity to bring your skills to a company where you can truly see the results of your efforts, you have found the right company.
